

Paper: ScienceTotal Marks: 100Month Test: 3rd Term

Obt. Marks: _____

Theme/Unit: _____

Grand Total: 100

Objective/Subjective:

ID: _____

Time: _____

Name: _____

class: 5th

Section: _____

**Question no 1:.****2×20=40****Encircle the correct option.**

1. The skeleton outside the bodies of _____ is made up of chitin.
a) fish (b) insect (c) birds
2. Bacteria are _____ organism.
(a) multicellular (b) colonial (c) unicellular
3. The _____ is involved in higher order thinking skills .
(a) cerebrum (b) medulla (c) cerebellum
4. _____ nerves carry messages from our sense organ to the spinal cord .
(a) sensory (b) motor (c) Autonomic
5. The _____ control all involuntary actions of the body.
(a) cerebrum (b) medulla (c) cerebellum
6. _____ is not example of a voluntary action.
(a) Digestion of food (b) swimming. (c). Hiking
7. Which of the following is not an example of microscopic fungi?
(a) mould (b) mushroom (c) yeast
8. _____ Is not caused by virus.
(a) hepatitis (b) Ringworm (c) mumps
9. _____ are completely harmful to their host.
(a) fungi (b) viruses (c) bacteria
10. Athletes foot is a common disease caused by _____.
(a) fungi (b) a virus (c) bacteria
11. Evaporation from plants and trees is called _____.

(a) condensation (b) transportation (c) collection

12. It rain when clouds become _____.

(a) lighter (b) ice (c) bigger and heavier

13.The underground water flows towards_____.

(a) clouds (b) rivers (c) mountains

14. Fog contains _____.

(a) smoke (b) dust (c) both smoke and dust

15. Dew is formed due to _____.

(a) condensation (b) evaporation (c) collection

16. Congo virus transfer to humans through _____.

(a) Animals (b) water (c) plants

17. The second link in a chain of infection is the _____.

(a) Host (b) reservoir (c) pathogen

18. Houseflies can spread diseases through .

(a) water (b) food (c) garbage

19. When disease causing microorganisms attack the human body,it result in_____.

(a) Immunity (b) infection (d) healing

20. _____ form a sticky colourless film that is called plaque.

(a) fungi (b) virus (c) bacteria

Question no 2: Fill in the blanks.

4

1 . A microscope is used to see particals.

2. Plants are called Because they can prepare their own food.

3. Microorganisms that cause disease are called.....

4. Water exit naturally on earth in allstates

Question no 3: write True or False.

4

1.Dew is another form of water vapours.

2. When precipitation start water do not fall on the ground.

3. The largest part of the brain is cerebrum.

4. bacteria are multicellular organism.

Question no 4: answer the short question. 10 x2 =20

1. What are autotrophs?

2. Differentiate between voluntary and involuntary actions?

3. What is skull ? Why is it important?

4. What conditions are most favourable to the mould growth?

5. define microorganisms?

6. what is infection?

7. What type of infection is caused by Aedes mosquito?

8. How many states of water exist naturally?

9. Define dew?

10. Define frost?

Question no 5: In how many ways can microorganisms enter the body? 10

Question no 6: What are possible some possible ways to avoid infections? 10
