We see a kind of milk in tins. It is powdered milk. All the water in this milk has evaporated. When fresh milk stays in a dish for a little time, the thick part of the milk comes to the top. This is the cream of the Milk. From this cream people make butter. If milk with the cream on it is made into powder, it is called "Full Cream Milk Powder". When something floating is taken off the top of a liquid, we say it is skimmed. When the Cream is skimmed from the milk, the thin milk that stays is called "Skim Milk".
